## COLOUR CRAFT - RICH BLACK AND PURE BLACK EXPLAINED

**Rich Black:** This is a deep, vibrant black created by adding 30% of each color (cyan, magenta, and yellow) to the black. It's used in color printing to make black look richer.

**Pure Black:** This is just 100% black ink without any added colors. It's used when printing with a black-only printer, where no other colors can be used.

For example, the Nadin West logo uses rich black in its print versions to make the black stand out more.
